

ELECTRICAL SAFETY BASICS

NFPA 70E 2021 Training

PRESENTED BY
Electrical Professional Consultants

January 21 & 28, 2021 - 5-7PM PT

This is a virtual class totaling 4 hours

Date: January 21 & 28, 2021

Time: 5:00 PM-7:00 PM

Instructor: Howard Herndon

This is a 4-hour virtual class based on NFPA 70E covering the basics of electrical safety. This class provides an overview of electrical hazards such as electric shock, arc flash and arc blast. We will also cover lock-out tag-out, electrical energy verification, PPE selection and other major topics found in NFPA 70E 2021.

With over 40-years of experience in the electrical industry, Howard provides concise and clear information on what you need to know concerning basic electrical safety.

Cost per attendee: \$150.00

ICC Continuing Education Units (0.4) provided

Registration closes on January 15, 2021. This class meets the NV Electrical Qualifications Card renewal CEU requirements. Both sessions are required attendance for CEU'S to be issued, no refunds will be provided. Attendees must have an adequate laptop/tablet/computer with a stable internet connection, camera, speaker, and microphone. Phones are not acceptable for this class.
