Join our series of three classes designed to prepare you for NEC Journeyman, Master, and Inspections electrical exams. These sessions aim to

- ➔ increase your knowledge of electrical code and theory
- ➔ bolster your confidence in navigating the NEC
- ➔ help structure your exam preparation process

## August 8, 2026 - Exam Prep Fundamentals

In this foundational class, we'll review productive learning strategies, explore the code layout and efficient search techniques, and cover general requirements found in Articles 90, 100, 110, 210, 215, and 230.

## August 22, 2026 - Focus on Load Calculations

Learn how to use Article 220 to calculate load for branch circuits, feeders, and service conductors for any occupancy. Learn about the significant changes that occurred for load calculations in the 2020 and 2023 electrical codes.

## September 5, 2026 - Focus on Motors, Wiring, Grounding and Bonding, and Overcurrent Protection Sizing

Learn how to use Articles 240, 250, 310, and 430 for conductor sizing, breaker and fuse sizing, grounding and bonding, and navigating the complexities of motor-related questions.

By familiarizing you with these subjects, our aim is to prevent any roadblocks in your exam journey and ensure you're well-prepared to tackle every question that comes your way.
